**MODULE TITLE: WEB APPLICATION
DEVELOPMENT**

MODULE CODE: CMP7246

LECTURER: DR RASHEED MOHAMMAD NASSR

Introduction

Cartify is a mini e-commerce website. It allows users to browse products, add them to a cart, and complete purchases using Stripe checkout. The website also supports user authentication (login and registration), order history, and wishlist functionality.

Features

The main features of Cartify include:

- User registration and login system
- Product browsing by categories and searching
- Add products to cart and wishlist
- Checkout using Stripe payment integration
- Order history and order details view
- Stock management logic to reduce stock after purchase

Setup Instructions

Follow these steps to run Cartify on your system:

1. Clone or download the project files.
2. Open two terminals: one for the backend (server) and one for the frontend (client).
3. In the `SERVER` folder, run `npm install` to install dependencies.
4. Create a `.env` file in the `SERVER` folder with the following variables:

```
PORT=5000
MONGODB_URI=mongodb://127.0.0.1:27017/certify OR YOUR_MONGODB_URL
STORE_CURRENCY=gbp
JWT_SECRET=change_me_in_prod
STRIPE_SECRET_KEY=sk_test_YOUR_SECRET_KEY
FRONTEND_URL=http://localhost:3000
```

5. Run `npm run seed` inside the `SERVER` folder to populate the database with products and categories.
6. Start the backend server with `npm start`.
7. In the `src` (React frontend) folder, run `npm install`.
8. Create a `.env` file in the React frontend with the variable:

```
REACT_APP_API_URL=http://localhost:5000
REACT_APP_STRIPE_PUBLIC_KEY=pk_test_YOUR_TEST_KEY
```

9. Start the React app with ``npm start``.
10. Open the website at `http://localhost:3000`

Pages

1. Home Page

Displays a hero section and highlights products across categories.

2. Login and Register Pages

Allow users to create accounts and log in securely using JWT authentication.

3. Product Listing Page

Shows all products or products filtered by category, users can find products by search , with add to cart and wish list options.

4. Cart Page

Displays the items the user has added to their cart, with options to update quantity or remove items.

5. Checkout Success/Cancel Pages

After a purchase, users are redirected to the success page or cancel page depending on the payment outcome.

6. Orders Page

Displays the list of orders placed by the logged-in user, including order totals and dates.

7. Order Detail Page

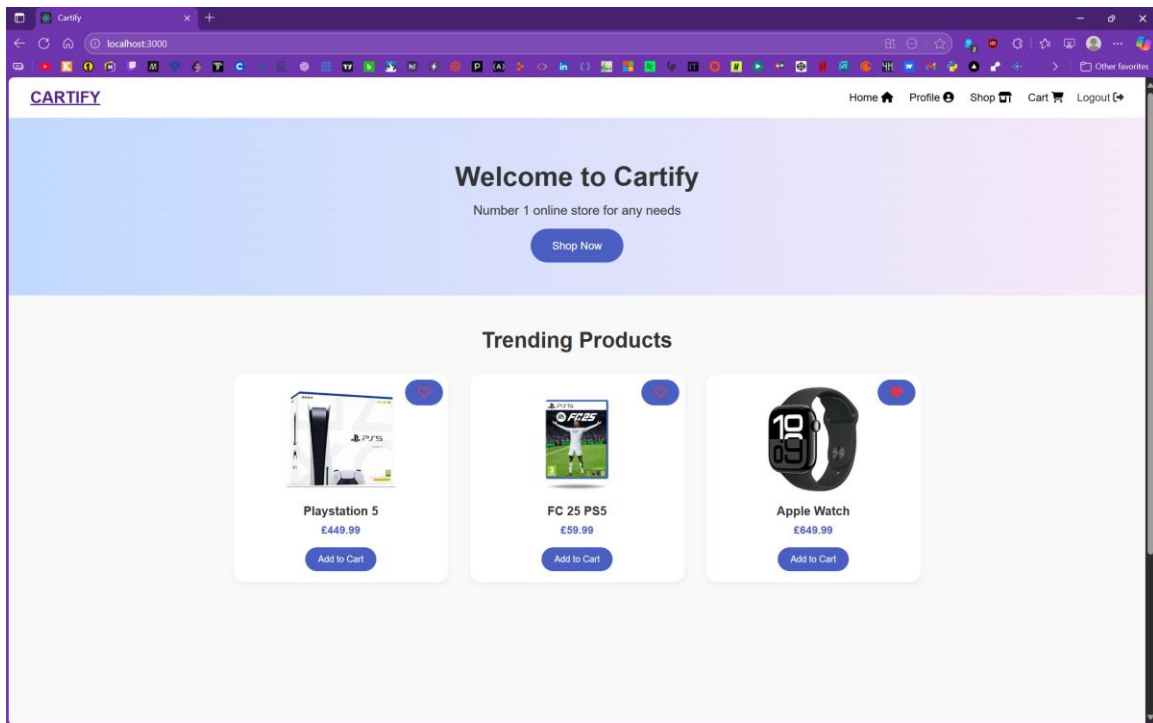

Shows detailed information about a single order, including items, quantities, prices, and totals.

8. FAQ Page

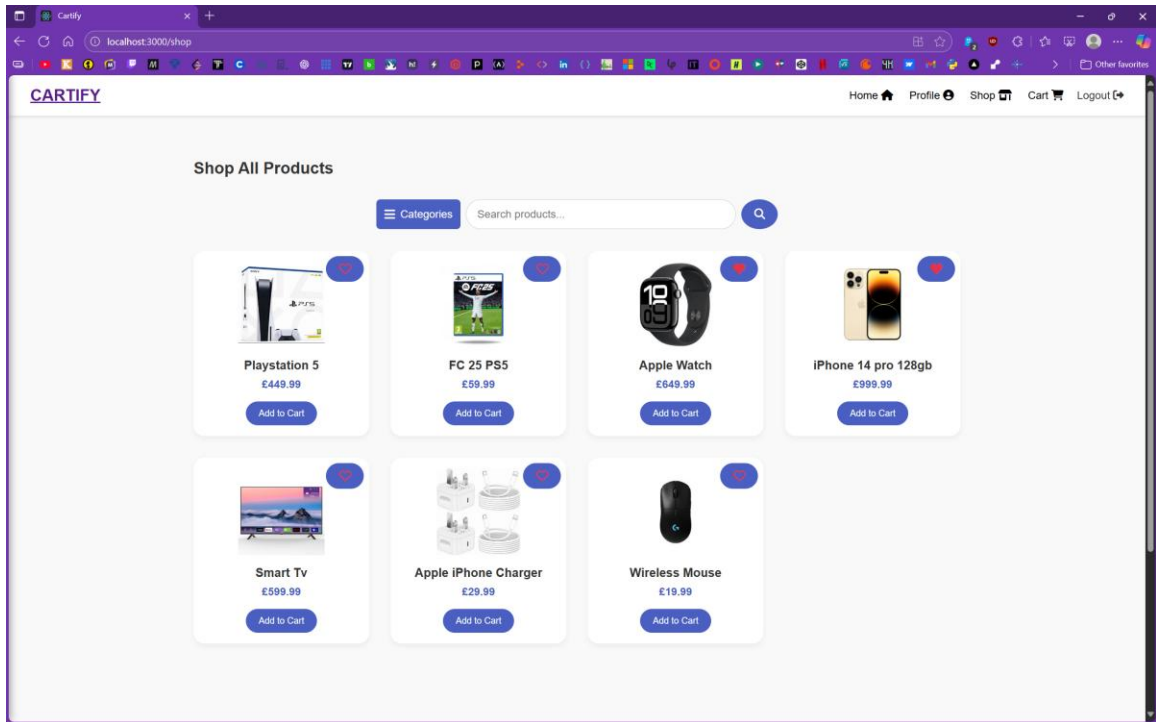

Displays questions with answers on how the site functions.
